

Benefits to AMTE Affiliates

The mission of the Association of Mathematics Teacher Educators (AMTE) is to promote the improvement of mathematics teacher education in all aspects. AMTE recognizes that it is not alone in its efforts and seeks to support the work of other groups that have a similar or related mission. To this end, AMTE recognizes the importance of establishing a network of affiliates and offers the benefits outlined below to its affiliates.

1. Resources

As an AMTE affiliate, your organization has access to the following:

- Information regarding how to establish your organization, including not-for-profit/non-profit information;
- Access to articles for use in affiliate newsletters;
- Information/support with regard to establishing and maintaining a website; and
- Information regarding how to write position papers.

In addition, your affiliate members have access to information made available to AMTE members via newsletters, website, etc.

2. Support with initiatives

AMTE supports its affiliates by providing the following:

- A nationally-backed, organized vehicle for stating positions, lobbying, and/or making policy suggestions (i.e. state educational licensure); and
- Contact with a network of nationally recognized experts who could lend support and expertise to state initiatives.

3. Broadening the scope of your work

As an AMTE affiliate, you represent a statewide/regional organization for mathematics educators. This allows mathematics educators in the state/region to meet and provides opportunities for collaboration (research, state-wide initiatives, etc). AMTE supports this work by providing the following:

- Networking opportunities with mathematics educators from across the nation; and
- Access to information that facilitates state organizations in being proactive regarding state/regional issues.
